IRComfort is a Spanish company specialized in Far Infrared (FIR) heating appliances. We are a group of engineers committed to technology, ecology community development and continuous improvement of our products.

Far Infrared (FIR) technology irradiates heat over people, objects and living beings, but not to the surrounding air which implies a huge saving cost. Lower consumption allow FIR technology to operate in both AC or DC systems and renewable energy installations or even with batteries.

For industrial purposes far infrared (FIR) technology means a drastic time reduction in operative processes and improved temperature control, all of this oriented to the quality of the product by putting the emphasis in preserving organoleptics qualities.

WE DEVELOP

IRCONFORT IS A 7 YEARS OLD COMPANY BASED IN SPAIN. AT IRCONFORT WE DESIGN, DEVELOP AND BUILD FAR INFRARED EMISSION EQUIPMENT. OUR INTERNATIONALLY PATENTED TECHNOLOGY PRODUCTS ARE BUILT IN SPAIN UNDER STRICT EC-QUALITY SPECIFICATIONS.

IRCONFORT systems offer lower energy consumption when compared to traditional systems. Depending on the case, reductions from 20% to 80% can be obtained. We offer simple, robust, and scalable design, which implies easier installation, adaptability, portability and maintenance cost reduction.

Temperature control is precise and regulable, in both domestic and industrial heating. Zero emission advantage. No smokes, ammonia or methane. No CO2 polluting gasses. Safer operation. Less security measures to be implemented.

INDUSTRIAL AREAS

IRCONFORT BUILDS PRODUCTS AND
SYSTEMS TO BE USED IN DIFFERENT
INDUSTRIAL AREAS:

AGRO INDUSTRY:

- Fruit dehydraters
- Grain dryers
- Bird farming systems
- Animal wellness, horses, dogs...

HÁBITAT AREA:

- Integral house heating.
- Personalized designs for hotels and communities
- Kitchen and bath systems
- On demand tailored designs
- Complete office systems
- Under table personal systems

INDUSTRY AND SERVICES

- Food warming tables for hotels and restaurants
- Cinema and theatre seat heating systems.
- Malls and supermarket integral heating systems
- School, universities and education centers. Operating rooms, dental clinics, labs, and any other aseptic installation,.
- Terrace and exterior installations for hotels and services.
- Coating, lacquering and wet paint drying systems.
- Bikram Yoga installations
- Sistemas para calefacción de puestos de trabajo en naves industriales Estudio y desarrollo de soluciones específicas para diversas necesidades de la industria y comercio
- Equipos sauna K'domo

MAIN MARKETS

WE SELL OUR PRODUCTS IN SPAIN AND
INTERNATIONALLY IN THE FOLLOWING
MARKETS:

ACTIVE:

- Chile
- Perú
- Ecuador
- Italia
- Colombia

IN DEVELOPMENT

- Canadá
- Hungría
- Bulgaria
- Rumania
- Polonia

PROSPECT MARKETS FOR THE NEAR FUTURE:

- USA
- MÉXICO
- RUSIA
- ESCANDINAVIA
- REINO UNIDO
- AUSTRIA
- SUIZA
- ALEMANIA
- FRANCIA

OUR FINAL CLIENTS.

OUR CLIENT SCOPE IS VERY WIDE. HERE WE
INCLUDE A REPRESENTATION BASED ON
INDUSTRIAL AREAS:

AGRO:

- Poultry farmers
- Greenhouse
- Dehydrated food exporters
- Auxiliar agriculture services
- Public institutions
- Grain Dryers

INDUSTRY

- Hospitals
- Gyms and sport centers
- Malls and commercial centers
- Educative institutions and schools
- Public institutions
- Cinemas and theaters

HABITAT:

- Home and Family
- Hotels
- Offices
- Bussines
- Bureau
- Bank offices
- Elderly retires
- Coffee shops and Restaurants
